

To: Whom it may concern:

Walter Burien has worked for 14-years to bring forward that taxation is not needed in the US or in fact Worldwide.

His website is: <http://CAFRI.com> .

A finance structure can be established in any country that utilizes investment return and contributions from government enterprise operations to replace the revenue source of taxation.

In doing so it creates a thriving economy indefinitely for the governments and population operating under this principle.

Taxation is and has always been extortion. It creates an environment in a reality scenario similar to giving a crack addict an unlimited supply of cocaine.

A review of local governments income (the take) over the last 25-years, say 1980 to 2005 in most cases shows a 2000% to 3000% increase in the local government's take while during the same time the populations income may have increased 100% to 140%. The disparity here is obvious and the end effect has been disastrous for all from the population.

Local and federal government collectively as of the year 2000 per gross income brings in more from investment return than all taxation collected.

1. Investment return is a revenue source.
2. Taxation is a revenue source.
3. Enterprise income is a revenue source.

Within any government structure #1 and #3 can be utilized to completely eliminate #2

The way this is done is through what is called TRF accounts (Tax Retirement Funds). Designed to do just that: Retire Taxation.

There is no greater importance than doing this. It positively effects every circumstance facing the world population.

For the last several thousand years, government administrations as they may be, have utilized their populations as a productivity resource to be drained and managed. This has never been a good thing nor will it ever be a good thing.

Under the TRF funding principle the most important aspect is that it changes the intent of government administrations from that of viewing the population as being a productivity resource to be drained and managed to that of wanting to see the population as wealthy and prosperous as possible.

The stronger the population's wealth base is, the more consistent and stronger the investment returns are funding government.

In all respects this creates a thriving economy, a steady and strong revenue generation for local governments, and a standard of excellence ever increasing for all within the population.

Taxation has burdened the population for to long of a time. It has created ever-growing systematic corruption in every government venue on earth. It is not needed and through application of the TRF principle it can be phased out and eliminated for all time to come.

What is required to make this happen is education of the mass population whereby the thinking and intent from one and all is to make this happen. All are now on the same page.

The roots of taxation out of primarily greed and opportunity to tax run deep. In all respects the population has been utilized as an easy mark for subjugation and exploitation in this arena for centuries.

This is not just an issue. In all light with objective thinking applied it is "the" issue in which most of the world's problems stem from. It degrades the standard of living of all from the general population.

The poor, middle class and wealthy are significantly drained in all respects by taxation. The TRF principle of operation in funding government eliminates that drain while at the same time creating thriving and prosperous economies.

There is no greater gift that can be given at this time to the population of the Earth than the elimination of taxation and in resulting effect creating a stable and very prosperous economy for one and all forward from that point in time.

Again, education of the mass population is essential in making this happen. The principle of operation of TRF accounts is sound, proven, and urgently needed to offset the runaway train of taxation that is very evidently dragging down the world economies.

The runaway effect of ever increasing taxation in all light is leading to the social, economic, and moral collapse of the people's of Earth.

It is not needed and the train wreck of that runaway train needs to be averted before that train hits the concrete wall at the end of the tracks at 400 MPH.

That train wreck can be averted if the population and government administrations grasps the very positive end results that the TRF principle of management accomplishes for the population of the world in funding government operations without the need for any taxation.

Can this be done? Yes.

It is up to each and every one of us to make this happen. Again, taxation is very well rooted having led to massive corruption and excessive force and tactics used for its collection.

Is taxation smart money? No. It has evolved into racketeering of no equal on every level.

Is the TRF management principle smart money? Yes. In effect the TRF creates a prosperous population building their wealth in combination with a thriving economy for all time to come, without the need for any taxation.

Your organization, if you choose to do so can comprehensively educate its members as to the reality of this world changing proposition to end taxation for the benefit of every one of your membership and one and all worldwide.
