## CAFRI NATIONAL POST

Fill the Void - ARCHIVED AT - <http://CAFRI.com/TheVoid.html>

# Let me make this real clear! Save and Share!

by Walter Burien  
 09/29/12

Please read to the end of this communication. Your life and the lives of your children depends on it:

### **DO NOT LET YOURSELF BE DISTRACTED FROM THE FOLLOWING FACTS:**

1. Many large local governments since 2007 to 2012 significantly increased their operating budgets (their take) during a time (2008 - 2012) when a severe recession was effecting the country. **EXAMPLE:** LA County increased their budget from 2007 of 17.5 billion dollars to 25.8 billion dollars come 2012, a 47% increase.

The tactic used from many local governments of crying poverty to increase income has and will create a breaking point on the population and small businesses of this country at this time. A breaking point now and into the future leading to a total collapse of the private sector's wealth to nil is in motion.

If in 2007 all local government's income had been frozen at 2007 levels, or reduced back to 2000 levels the severe problem facing the private sector of wealth depletion would have been checked back in 2007. Smart and personal responsibility from all is required to reverse this circumstance. No more "masterful entertainment" for the purpose of distraction can be allowed.

Now if you want to be played as a useful idiot by local government operators, then sit back and wait for the inevitable outcome of being plundered, striped of your wealth, and broken. Then you can scratch your head and again playing the useful idiot saying "What happened, why did this happen, how could it have gotten so bad?"

The CAFRI is local government's "Statement of Worth". How many people are hearing about them and responsibly looking at them? Way to few. The CAFRIs over the last seventy-years were not intended to be looked at by the population. The majority of the population were whisked away into masterful entertainment and distraction to not look and learn.

**EVERY** candidate running for public office or "supposed" public advocacy groups in true conscience for their constituents should be listing the local government CAFRIs of Sate; County; School District; State University; Enterprise; and Gov Pensions on their websites and in their news letters directing followers to carefully look at them for comment.

For these individuals to maintain a vacuum and void in this arena is unacceptable by any terms of the imagination. If they maintain the void they are conclusively showing they are 100% in cooperation with the plunder of their own constituents, with those individuals eagerly awaiting out of opportunity to have

access to the same wealth base they refuse to mention. **IN ALL REALITY** maintaining the void, they establish their intent as a thief in the night drooling over the opportunity to join the gang(s) that has and will steal from you blind. This "is" the issue that all other issues stem from and should be diligently focused on as such.

2. Specifically due to the circumstances outlined in #1 above, elections on almost all levels are NOT elections but a dog and pony show to give the population the illusion they have a choice in who oversees their affairs from within government. Due to the money and control of the same involved candidates are hand picked by the gang(s) and then exclusively marketed to the voting public.

The candidates that would actually truly move with decisive action for the protection of the population regarding #1 above enter into the same carefully orchestrated void of omission not to be seen or even considered by the voting public. With most of the public being treated by the gang(s) as useful idiots to accomplish the end result of further plunder and wealth enhancement of and by the inside players of the gang(s). I mean no insult intended to the mass population, they HAVE BEEN masterfully entertained by one of the most formidable organized corporate multi-trillion dollar syndicate the world has ever known.

There are 3200 individuals on the CAFRI National email list. CAFRI is NOT trying to use those 3200 as useful idiots but to use them as intelligent; responsible; patriotic; wise; and potentially formidable human-beings to educate the mass population towards these very BASIC factors outlined in #1 and #2 here to fill the gap of the well maintained void. If it turns out that there is 100 out of the 3200 or 3000 out of the 3200 that qualify for the mission at hand, how many noble Spartans were there that held back the thousands of invading forces at the pass to protect their country centuries ago?

This is a War. **A war involving hundreds of trillions of dollars** that by the public's intent from a century ago "was supposedly to have directly benefited" you and your families. Massive wealth that has and is being for all intents and purposes slyly plundered away from its intended purpose. Spartans unite and meet at the pass!

A good start would be to make sure this communication is read by almost every person in this country. Read by email forward; site posting; publication in the local paper; posted at every rally, public or private meeting; and any government function (especially a raise or lower taxation government meeting) Don't be controlled by the spoon feeding of the syndicate, feed yourself and all that you know with the masterfully omitted basic facts as shown here and that can be viewed when pulling up your local government's CAFR for review. Keep in mind the syndicate views and has treated you as useful idiots. They depend on your maintained ignorance and you not having the ability to understand the basics. They believe if the idiots are looking at the entrance to the gold mine, they can throw out a distraction and the lookers will go elsewhere. Worked great for them over the last few decades so expect the same now.

**If the in power gang(s)** for whatever insane reason wanted to sponsor Charles Manson and Ted Bundy as the candidates of choice for President, you would NOT hear on ABC; NBC; FOX; CNN; or your syndicated media talking head show the names Barack Obama or Mitt Romney, you would only hear the names Manson and Bundy with the catch phrase slogans being for Manson "The family is what is important" and for Bundy "There is no reason why every American should not have food on the table and a full refrigerator".

If 85% of the population was outraged they would be drowned out by omission within the daily saturation from the 100% controlled syndicated media in conjunction with the two controlled primary political parties to (the intended) end effect (make the 85%) think they were in the minority having been

wrong in their thinking to object to Manson and Bundy. Come election time, the two promoted choices of Manson and Bundy would be voted on, and based on the spoon feeding presented to the population, one would be elected president. Now the good democrat would vote for Manson and the good republican would vote for Bundy.

It may be a small voter turnout but the overall choice of the gang(s) would be elected president. If Jesus Christ; Gandhi; and Mohammad were running in the same election, if drowned out by the syndicated media and both political parties, blocked from being on the ballot, come election time 70% of the population would not even know they could be voted for on the ballot and as intended the majority of the population will vote for Manson or Bundy. The 15% or 20% that may have found out otherwise and would write in the before mentioned, they will not have an effect on the outcome of the ballot vote.

3. The outcomes of #1 and #2 have and are strictly set into motion and masterfully determined "DUE TO THE MONEY AND CONTROL" involved. With the population being masterfully entertained into distraction with War; rumors of War; Economic Collapse; depression; recession; the value of the dollar; selective spoon fed misdirection from the basics of massive wealth being taken and accumulated throughout all levels of local governments and federal, the same well orchestrated results will repeat themselves over and over again. The in-place cycle of control; plunder; and population management will not be broken.

**The key to breaking and modifying the cycle?** Very simple: Look and learn, not being distracted or misdirected as to the degree and scope of how you are being plundered from. See through, and conduct a careful examination of your local government CAFRs, a local government's Annual Financial Report. Spotlight the showing of wealth accumulated over the decades and reveal a more complete showing of the annual income brought in there from. You were not intended to look and see. Break through the masterfully created and maintained dense fog, find, look, and learn.

Seeing and learning does seem to create a visceral reaction from individuals from the population for unified public correction of the matter. The gang(s) want to keep that number of learners small but with clear objective and a "focused" population unified in the force of truth, comprehension can burst forth like an exploding nova.

The in-place structure was created by sly selective presentation, omission, and force. It can be modified by public comprehension and unified smart force applied and allied.

**BUT NOTHING WILL CHANGE** if the population continues to be masterfully misdirected through distraction not to look and learn the basics. Many will look and fall short of learning the strong points. It is that 10% to 30% factor of responsible individuals, the Spartans who look, learn, and comprehend who will be effective in the mission to protect us one-and-all from further plunder. Just remember to support them with all of your might when they move forward to do so in all of our behalf.

Wars are not won with talk and intent. Wars are won with decisive use of force; timing; materials; and funding for the same. The current in place syndicate is fat; arrogant; and somewhat over the last ten-years fighting amongst themselves in how the annual booty will be divided up and the standing wealth amassed utilized. It is a good time for the population to mobilize and in force direct the internal gang(s) guidelines and modifying of the rules towards those issues on every level of local government and federal.

When taking a trip, any trip it is essential to look at the resources available; how they are structured; how they can be reapplied to reach the intended destination. So ONE-AND-All need to carefully look at those local government CAFRs, learn, and comprehend what they see.

4. Look at previous year CAFRs to see the growth of revenue taken over time, 5, 10, 20, 30 years. (hold on to your temper when you do).

With force require the Political Parties; Candidates running for Office; Syndicated media talking heads to break their "intentional" silence and make simple mention of the local government CAFRs directing one-and-all to look and learn from the same.

I emphasize force in numbers is required to meet that objective. **Make it clear in no uncertain terms** that if they continue to perpetuate the "Silence is Golden" game involving trillions of collective dollars of income and wealth held per the intentional exclusion of mention of local government CAFRs, they will be on the actively promoted s\*\*t list for one and all to see and why.. Spartans unite, the enemy in numbers is at the gates and have clearly breached the walls.

Please share this communication with all that you know and ask them CLEARLY to share with all that they know.

Our future and the futures of our children depend on the comprehension of this one communication being clearly embedded in the forefront comprehension of a now masterfully entertained and controlled population that has had a **void of the basics** intentionally maintained in their consciousness DUE TO THE MONEY and population control involved.

The fate of the world rests in the hands of the 3200 on the CAFRI National email list and those that they communicate with . Your responsible action to effect your own fate and the fate of all others now rests in your hands.

The plunder of our own wealth and that of the marks selected from around the globe must stop if we wish to survive. Not doing so leads to an out of control freight train running at 400 MPH at a 1-mile thick concrete wall that is just a short distance down the tracks. The collision with that wall would not be survivable.

Communicated FYI and for the attempt to assist at your and one-and-all's prosperous and good future outcome.

Communicated also to protect your own survival that truly is in jeopardy based on the circumstances outlined above.

Truly yours and sincerely,

Walter Burien - CAFRI.com

## -----FOOTER NOTE-----

Per understanding CAFRs - Google CAFR, people have been intentionally kept in the dark so long they forget the basics:

1. A government "Budget Report" is a selective funding of x accounts from x resources, set up to be primarily funded with taxation and done so as a projection "for the year".
2. An "Annual Financial Report" for a local government is the showing of "all" income: Investment; taxation; and Enterprise, plus the "accumulated wealth" over decades. Budgets are for the year, an AFR is for it all since creation of the entity.

There is a big difference between the two. A correct analogy would be: The budget to operate your house vs. your statement of net worth.

The public has been played with the biggest shell game of selective presentation there is allowing for massive fortunes to be made by the inside players over the last several decades..

Every investment fund large and small is a power base. Where that money is invested determines what company; real-estate venture, project, etc., is made or broken. Thus in line with that, never a mention of the 184,000 AFRs of the corresponding local governments..nor the many thousands of specialty investment funds they contain. I note gov pension funds facilitate the same. Paying employee benefits from the return on the funds is an after thought for the government players.

The head communists back in the 30's and 40's said they could take over America without firing a shot. The undercurrents of that statement were that they could depend on the greed and opportunity of the players to accomplish that goal and it did. US Collective government since 2000 brings in more gross income than the entire gross income of the population of the United States.

Taxation is rammed down the public's throat (1/3rd of the gross income) and Investment / Enterprise income (2/3rd of the gross income) the "silence is golden" rule is strictly enforced with the full symbiotic cooperation of the syndicated media; controlled education; and both political parties as applies over the last century.

**NOTE:** Up until 1999 the CAFR showed the "gross" standing balances of income and investment fund balances. Then with onset of disclosure by CAFRI and the public now looking for the first time <http://GASB.org> (a 100% private association) who oversees the accounting guidelines of the CAFR, changes were made starting with transmittal letter-31 (up to 90 now) changing the showing in the CAFR from that of gross balances to a showing of "net" balances. Many games are played there so it is very important now to look through the "notes to the financial section" to spot or be directed to many of the specialty advance liability actual fund balances.

Government was NOT supposed to operate at a profit. How did they get around this restriction?  
ANSWER: If for example a city had a 100-million dollar profit for the year from any of its operations, at a stroke of a pen they create a "liability fund", deposit the profit, and poof, there goes the profit re-designated now as a liability.

**A personal example would be:**

If you and I ran a business for the last twenty years and we now had 1-billion dollars clear. We decide we are going to retire in five-years and want to buy an island in the Bahamas for 700-million dollars. So we create an advance liability fund, move 700-million dollars into it and now our "net" balance on our books is 300-million dollars. Now if with drafted a "Budget" for our business operations (projection of expenses for the upcoming year) of say 325-million dollars, that budget would show us to be 25-million dollars in the red. If we now actually spent 200-million for the upcoming year, gee, we now have 125-million we can move into our "buy an island liability fund in the Bahamas" zero out our profit, have the ability to buy a bigger island now with 825-million in our fund, and start the process all over again for next year.

**Now catch this point:** On our accounting of the "buy an island fund", our liability if we left the price at 700-million and the fund balance was 825-million, the "net" balance of the fund is now 125-million dollars. (700-million of the funds balance is a liability to pay). If we modified the liability to 825-million then our "net" fund balance is zero.  $825 - 825 = 0$

**One other tactic we could use as a mask of our true funds held** would be to take the 825-million, deposit it with some financial institution domestic or international and arrange a loan or investment from that same financial institution of 825-million using our own capital through that financial institution to give the impression the 825-million was 100% a debt for repayment to whatever X financial institution we were using in that shell game of appearance. AGAIN this is why it is important to carefully look at the notes to the financial section of the CAFR.

**Small local governments** are looked at closer by their constituents and thus less games are played. The larger local governments, the constituents are prone to not looking (they feel it is over their heads) and thus the games played run rampant and substantially more money is involved.
