# CAFRI IN REPLY TO: CALFOTOGAL (DEBRA)

**Re: What is the CAFR Scam? Criminal charges have been filed against the Washington State Corporate Government**

Good morning Debra:

I know many people say government should not be invested in the market and derivatives. Those that do, it is because they just got a clue that government has massive decades old investments ever-growing.

Very profitable investments if any bothered to look at the compounded 10-year average rate of return.

Government institutional investments have blown away the private sector rates of return on investments now for several decades. The allocation of those funds "controls" the economy of the world now. Additionally, I note disconcertingly, they have also been used to manipulate world markets with the intent of liquidating all others of their wealth.

Those investments cover the whole spectrum from owning apartment buildings in Thailand to the local shopping mall that all shop in or the town home complex they live in with those same individuals thinking "privately owned". But if they checked funding / investment ownership, they are in many cases owned by their local County; City; State; Government pension; or School district by investment participation. The scope of investments is massive and very diversified globally.

The reality of this situation is: Government little bit by little bit over the decades funneled tax revenue out of, or designated within liability accounts they created, and "took it all over by investment" without making the population the first line beneficiary of the return generated therefrom. The return was reinvested and rolled over by the inside players for their benefit.

The "easy mark" taxpayer was bled dry in this respect with that productivity value being consolidated little bit by little bit by and for the benefit of the inside players. At a %5 rollover each year compounded, my favorite expression is: "There are only so many nickels in a dollar."

The average person, who most did not have a clue in the first place this was taking place, their

original reaction is: "Sell it all off and give it to us". (Sounds like same intent of a "get his hands in the pockets" politician to me)

In basics that is about as ignorant as it gets. Liquidation would make the 1929 event look like a birthday party, the economy would crash to unprecedented proportions, the dollar's buying power would go to worthless, and hyper inflation would set in causing 3,000% to 4,000% increases in all staple consumables. Liquidation would implode the entire economy. Now if it were 70-years ago, the effect and the size of liquidation would be minimal being that government had not yet taken it all over by investment. But as of today they have.

**Now get this point real clearly:** No yelling of: Fraud! Abuse! Should Never have happened! They all should be in Jail! (which is the case in reality but will never happen)

When someone finds a massive gold vein on their property, they do not yell: Fraud! Abuse! Should Never have happened! If they are intelligent they mine the gold and take whatever steps needed to make sure someone does not rob the gold from them before they mine and sell it. When there is massive wealth and ownership of that wealth involved, it's "fight on."

In the case of the massive government investments, the structure can be put into place to identify; consolidate; and set the terms where as the "first-line" principle the investment return is utilized / designated to phase out and then eliminate taxation. That is the true and long lasting mining of the gold vein established for the "direct benefit" of the population "and" in maintaining an expanding a prosperous economy for all time to come. Get it?

Now to get that done in the current environment of a well maintained ignorance; thousands of government attorneys / politicians; cohorts from the syndicated media and education going out of their way in maintaining "the easy mark scenario" of taxation to continue business as usual is a monumental task. It is a situation of an ant looking up at the elephant saying: "Stop walking in my direction, this is my home and if you continue in this direction you will destroy it!"

Now in most likelihood the elephant will never even notice the ant and have trampled the ant and its home never knowing the ant even existed in the first place. Well, in nature when a threat comes, the ants swarm. Red ants are extremely good at this being that their bite has the effect of feeling like a bee-sting. Animals, even elephants when inadvertently stepping on their home upon being swarmed will stay clear of that location. There is no scattered mentality in the ant colony. When a threat presents itself, they swarm as a well trained army against any intruder large or small with only one focused intent: "Defend the home!" What government does due to the wealth involved expends massive effort to misdirect the focus of the swarm. They are very good at doing that. They have it down to a refined art.

Government uses distraction; misdirection; omission, and confusion as very effective tools to continue "business as usual"

Back to the ant and the elephant scenario, the swarm focus needs to be on the core and most effective long lasting remedy: Consolidating the investment wealth held under specific terms with specific objectives to establish the population as the first-line-beneficiary through the phasing out and then elimination of all taxation. Get it?

The swarm needs to be focused and too the point! Otherwise it is just perpetuating the game of distraction; misdirection; omission, and confusion as it stands now to the first line benefit of the government inside players unrestrained...

The easiest first-line point that creates the trigger for public cognitive comprehension is:  
"Government pension funds were established to generate massive returns that pay the salaries and health benefits for tens of millions of government employees. The exact same structure of funding accounts can be consolidated and established designated to offset and cancel taxation venue by venue under specific terms to do so."

Now the government player would crap if the swarm was "exclusively" focused on this one very basic and fundamental point.

You see, they have already proved it will work from the decades of management of their own collectively multitrillion dollar funds managed globally and the returns they generate annually. The City of Mesa, AZ in part (45% to 65% of their budget depending on what year you look at) has been doing this now for over 40-years. The TRF funds take it the extra 9-yards established in targeting 100% satisfaction of government budgets, taxation not needed. The ever-growing economy and the population's wealth would positively explode under this method of operating government.

I am ready to walk down the clear and focused path of ending taxation, and in as such creating a prosperous economy for one-and-all, are you? If yes, then focus the swarm on the 1st line point that does so as expressed above.

Two days ago towards the top of the CAFRI.com homepage I put up a funding sponsorship request: "Mr. Smith (CAFRI) wants to go to Washington". I have the goal target of raising \$40,000 in sponsorship by 02/14/13 to make the trip. Allocation will be 20K for the trip and 20K for carry-through upon return. One wealth individual could provide the sponsorship goal or it can come from many. The bottom line is: I am focused; clear too the point; and can create a swarm of cognitive thinking from the inside players in DC to make this move forward to happen.

<http://CAFRI.com/MrSmith.html>

If you ever watched the movie Braveheart, do you remember when the the Scottish amassed for the first battle against the British? Well, they were conditioned to tuck their tails between their legs and go home with a few scraps thrown to them by the British. Braveheart then said to them: "Yes, you can take the scraps thrown to you from Long Shanks table, go home and sleep safely in your beds, and die in old age. But would you pass up the one opportunity to fight and win, saying to the British, you may take my life but you will never take my freedom!" The fight was on, and they won a decisive battle.

I never forgot the point right before that first battle began, the British Lord road up and met the Scottish Nobles in the middle of the battlefield to present the "term" offered. The Scottish Nobles were all ready to capitulate and then William Wallace intervened with his comments. That did not work out to well for the British.. Fight on!

Mr. Smith (CAFRI) wants to go to Washington. The center of the battlefield.. and lay out the terms for a prospering economy and the People's wealth preservation to the Senate and House for the People to become the first-line-beneficiary. Do you want to pass up being a sponsor, or in finding

others that can sponsor giving CAFRI the ability to make that happen? Well funded it happens, if not, not.

**All that know me** know I have no-fear, have the experience, and can present all points necessary subsequently and clearly to motivate and get the objective moving when and "if" getting the opportunity to directly address the DC gang.

My health has been failing over the last several years and I want to make sure the goal as stated above is accomplished while I am still here to make it happen, and see it happen.

Sent FYI and for your action,

Walter Burien - CAFRI.com  
P. O. Box 2112  
Saint Johns, AZ 85936

Tel. (928) 458-5854

PS: The filed court actions in WA state in your post below are good for 'stirring the pot' for disclosure but the "remedy" is not even mentioned. Additionally, the basics of "claimed liability" consequences is also absent. And I will note again, the CAFRI is not a "Second set of books" it is "The book"

**Please review this important information and forward it to your lists. It's past time to get informed of the governments "second set of books" or CAFRI's so you can separate the propaganda from the truth. The public should stop being suckered and start demanding answers of their "elected officials". Debra**

## The CAFR Scam -- [What is the CAFR Scam?](#)

### *CAFR: Comprehensive Annual Financial Reports*

- the actual amount of monies taken in by the government through taxation, withholding and other payment methods.

Here is an interview with Rebecca Campbell on CAFRs: (Starts about halfway through on part 1).

Part 1: <http://archives2012.gcnlive.com/Archives2012/nov12/PowerHour/1105122.mp3>

Part 2: <http://archives2012.gcnlive.com/Archives2012/nov12/PowerHour/1105123.mp3>

## Governments at all levels in most nations – [like many criminal enterprises](#) – keep two sets of books.

About one-third of our tax monies are recorded and identified as a government's "budgets". The other two-thirds are buried in their comprehensive annual financial reports (CAFRS) as various ["investment funds," "dedicated funds" and "pension funds."](#)

This fraudulent contemporary accounting procedure is what is known as the ["CAFR scam"](#).

### [How much money is hidden in the CAFR?](#)

These government [comprehensive annual financial reports \(CAFRs\)](#) show many billions of our local public monies have become legally unavailable to us (in [Washington State](#) it is **\$83 billion**).

**On an national level these funds reach into the trillions.**

We are at a time of bank-engineered global economic depression when these governments at all levels are claiming that they have severe deficits. In Washington State, the public budget deficit is claimed to be near \$2.5 billion ([Washington State's investments](#) in the commercial banking cartel alone represent nearly \$5 billion of public funds).

### [Where is this hidden money invested?](#)

Rather than being invested in the resident people whose money provides the basis of these investments, most government investments hidden in the [CAFR](#) are made in foreign entities such as:

- [Foreign governments](#)
- [Quasi Public Banks / International Agencies \(similar to State Banks formed in other](#)

- [nations\)](#)
- [Predator Corporations](#)

Many of these government investments are in **toxic investment instruments** such as derivatives and collateralized debt options (CDOs) set on unstable “trading platforms” that are set to collapse in the near future. These toxic investment instruments are based on the purchase of packaged debts, and constitute legalized gambling on the stock markets with billion/trillions of our money using [the most irresponsible methods imaginable](#).

### [There are Immediately Viable Economic Reforms](#)

### [Bringing Criminal and Civil Charges Against Public Officials](#)

The [CAFR Scam](#) constitutes deliberate denial of remedy, showing a pattern of [criminal intent](#).

If, therefore, these governments ignore the presence of these [hidden funds](#) and persist in enacting genocidal budget cuts to basic human services without applying [viable available remedies](#), they are violating national and international laws.

### [Case Study of the CAFR Scam:](#)

#### [The Washington State Investment Board](#)

**The Washington State Investment Board (WSIB)** is the agency responsible for investing all of the pension/dedicated funds controlled by the Washington State government, specifically the legislature. It openly defines and conducts itself like a private corporation, not a public agency.

This body was behind Issue 4215, the successful if disingenuous 2006 initiative to amend the state constitution to allow state monies in dedicated funds supplied by corporate natural resource extraction to be invested in corporate Wall Street investments, instead of being held in trust for higher education. Eighteen months later, the bottom fell out on Wall Street, devastating these funds while triggering increasingly draconian budget cuts and unaffordable tuition at state/community academic institutions.

## **FOR IMMEDIATE RELEASE: CRIMINAL / CIVIL CHARGES AGAINST THE WASHINGTON STATE CORPORATE GOVERNMENT / MEDIA FOR ONGOING SYSTEMIC FINANCIAL / CONSTITUTIONAL FRAUD AND TREASON**

Posted by [nowisthetimeus](#) on September 19, 2012

Seattle, Washington State, America  
September 20, 2012

Criminal/civil charges have been filed with referenced evidentiary weblinks against officials of the Washington State corporate government, as well as media corporations operating in Washington State, for perpetrating/enabling systemic financial/constitutional fraud and treason.

The allegations in these legal actions specifically expose what has been called the CAFR scam, with its implications of fraudulent unnecessary budget cuts to government services at all levels of government all across America as a result of theft by the private Federal Reserve System. These are accompanied by related allegations that the Washington State Constitution of 1889, as well as the present US corporate government, are fraudulent, and that failure to disclose this constitutes treason on the part of state corporate government/media officials.

These criminal/civil charges have been filed with the Federal Grand Jury of the Ninth District Court, the FBI, the Offices of the King County Sheriff, and that of the Seattle Chief of Police and Seattle City Prosecutor here in Seattle . They have also been filed in the state capital of Olympia/Thurston County with the Offices of the Thurston County Sheriff, the Thurston County Prosecutor, the Olympia Chief of Police and the Olympia City Prosecutor.

Copies of these charges' Proofs of Filing can be seen below. All civil/criminal charges filed at the local level were hand-delivered, with receipts signed at the front desk for documentation of filing. Those filed at the federal level even if local, as well as those filed at a distance in the Washington State capital of Olympia were filed via certified mail.

Those charges filed with the Federal Grand Jury were filed without return receipt to better ensure that they would reach the Foreperson without the interposition of possibly compromised court clerks or US attorneys; accordingly, a copy of the screen shot from the delivery tracking portion of the US Postal Service website has been scanned to show such proper filing, with delivery on September 10, 2012.

It should be mentioned that two attempts to file these charges with the King County Prosecutor's Office were unsuccessful. In both instances, clerks connected with this office rejected the packet of charges. They stated that sovereign citizens did not have the right to file criminal charges, and that all civil charges against the state need to be filed as a civil lawsuit at the sovereign citizen's expense — now \$400 — with the district court to be decided by state corporate government-appointed

judges. This clearly no-win proposition for the plaintiff was immediately rejected by this plaintiff.

All of the filings of these charges been done in such a way to ensure as well as is possible that appropriate action might be taken on the part of law enforcement/judicial agencies located in Washington State, and that if it is not, that such derogation of duty will become immediately and publicly apparent, as seen in the paragraph above concerning Proof of Public Disservice by the King County Prosecutor's Office.

Since the term "United States of America" is now often considered to denote the bank cartel-controlled federal government corporation, many geopolitically savvy sovereign citizens prefer being called "Americans" and their country "America", even though we share the North American continent with other nations. This dichotomy illustrates the gravity of the issues being discovered in this document, and is the reason that the terms "America" and "Americans" are herein being used instead of "USA" and "US citizens" to denote our nation and its legitimate inhabitants.

Media corporations operating in Washington State are, possibly for the first time in recorded history, included in such a legal action. It finally needs to be publicly acknowledged and acted upon that corporate media distortions and omissions in reporting the news as agreed upon in their corporate charters have long enabled such ongoing criminal activity on the part of corrupt corporate government officials in this state and in others throughout the world. This was also done to remind both media corporations and the public that, besides prosecution of their executives, corporate charters can be legally rescinded as a form of capital punishment for capitalist corporate entities whenever their corporate charters are repeatedly and reprehensibly violated, as many have been in recent memory.

It is hoped that these public legal actions will help create a template by which empowered sovereign citizens everywhere can draft their own like public legal actions based on their own situations, research and laws, and they, like sovereign citizens in Washington State, can themselves publicly file these charges with their own law enforcement agencies to help expose and systemically extirpate this ancient ongoing theft of planetary resources.

Other sovereign citizens of Washington State are cordially invited to print out these charges and file them with their own local law enforcement officials, as well as forward them to their elected representatives, to Washington State media and to their fellow citizens, so that general knowledge of such systemic evil and what can successfully eliminate it can rapidly be increased.

For it is only by such peaceful but effective means that the satanic international bank-based corporate crime syndicate that presently controls most of the governments of this planet will ultimately and forever be defeated.

WCSS 9-5-12.doc

**CRIMINAL / CIVIL CHARGES AGAINST WASHINGTON STATE  
CORPORATE GOVERNMENT OFFICIALS / MEDIA CORPORATIONS  
OPERATING IN WASHINGTON STATE FOR SYSTEMIC FINANCIAL /  
CONSTITUTIONAL FRAUD AND TREASON**

Against the following Washington State corporate government officials:

Governor Christine Gregoire, Treasurer James McIntire, Attorney General Robert McKenna, Washington State Investment Board Legislature Liaison Rep. Sharon Tomiko-Santos, Budget Director Martin Brown, President of the Senate Lisa Brown, Co-Chairmen of the Senate Ways and Means Committee, Senators Edward Murray and Joseph Zarelli, Speaker of the House Frank Chopp and Chairman of the House Ways and Means Committee Ross Hunter, as well as top management of mainstream/alleged alternative media corporations operating in Washington State, the following criminal/civil charges are alleged:

### 1. Systemic Ongoing Financial Fraud Against the People of Washington State

1.01 That the above mentioned Washington State corporate government officials and their predecessors in office, as well as mainstream/alleged alternative media corporations operating in Washington State have knowingly and repeatedly concealed the existence of approximately two-thirds of state monies shown in the Washington State Comprehensive Annual Financial Report, (CAFR) while misrepresenting the remaining one-third of these monies as the entire “state budget” since at least the mid-1940s;

Websites/links on CAFRs/CAFR Scam

[http://en.wikipedia.org/wiki/Comprehensive\\_annual\\_financial\\_report](http://en.wikipedia.org/wiki/Comprehensive_annual_financial_report)

<http://www.cafman.com> <http://www.cafr1.com>

[http://www.webofdebt.com/articles/mysterious\\_cafrs.php](http://www.webofdebt.com/articles/mysterious_cafrs.php)

<http://www.examiner.com/nonpartisan-in-national/carl-herman>

<http://www.comprehensiveannualfinancialreport.com>

1.02 That Washington State corporate government officials have invested the two-thirds of state monies concealed in the CAFR in institutional corporate Wall Street investments, rather than in investments that would directly benefit the people of Washington State, such as investments in small businesses with the much greater amount of employment, personal prosperity and government tax revenues they would provide, in infrastructure maintenance that would provide widespread employment as well as for the general welfare, or in a public state bank, which, as in the State of North Dakota since 1919, would eliminate state economic downturns altogether;

Websites on Pubic Banking

<http://www.wapublicbankproject.org> <http://www.publicbanking.org> <http://www.webofdebt.com>

1.03. That, next to institutional investments in the US government corporation’s increasingly devalued financial instruments — the collateral damage from the recently revealed LIBOR scandal (LIBOR=London Interbank Offered Rate or “LIBER” (Latin for “Unregulated”) —

<http://www.businessinsider.com/infographic-the-libor-scandal-explained-2012-7>

the state corporate government's largest investments are in the corrupt international banking cartel directly responsible for the global depression of 2008, in which the global economy, as well as that of Washington State presently remain;

1.04 That at least eighty-five percent of the state's investments are in foreign governmental or quasi-governmental entities and transnational corporations; few of them are in any entity located within Washington State, or in any headquartered in America;

1.05 That of these transnational corporate Wall Street investments, a disproportionate number are in predatory transnational corporations other than the predatory transnational banks, in which the majority of the people of Washington State, if sufficiently informed, would not want their money invested as a matter of ethical and/or environmental principles; this includes institutional investments in BP, Shell, Keystone XL, Dow Chemical, Massey Energy, Cargill and Monsanto;

1.06 That the Washington State government has a grave conflict of interest by aggressively promoting by both executive order and legislation the products of industries in which they have large investments, such as the pharmaceutical cartel and its bioweaponized vaccines, in which it has institutional investments of over one-half billion dollars;

Why the Washington State Government Is a Ruthless Vaccine Pusher

<http://www.allvoices.com/contributed-news/8367537-why-the-washington-state-government-is-a-ruthless-vaccine-pusher>

1.07 That the Washington State government has a grave conflict of interest by failing to proportionately tax those Washington State-located transnational corporations in which it is heavily invested and/or whose favor they wish to obtain;

1.08 That the Washington State government has a grave conflict of interest by investing in foreign manufacturing competitors while failing to invest in those which would provide manufacturing employment and infrastructure for the people of Washington State;

1.09 That the Washington State Investment Board (WSIB) — the financial arm of the Washington State Legislature headed by the state treasurer — employs financial advisers of questionable competence and integrity, including accused war criminal former US Secretary of State Madeline Albright and the infamously corrupt investment firm of Goldman Sachs — never consulting with those who offer any alternative economic perspectives and solutions, including those employed within the Washington State government itself;

1.10 That the WSIB plotted in the spring of 2006 to alter the Washington State Constitution so that the fulsome Washington State Education Fund — derived from regular fees paid by the state's resource extraction industries of mining, fishing and lumbering — could be used in the future for institutional corporate Wall Street investments, rather than as before being kept safely in trust;

1.11 That to achieve this diversion of state funds in trust, the WSIB quietly placed on the state ballot Issue 4215, which proposed an amendment to the Washington State Constitution allowing the state

higher education funds to be used in corporate Wall Street investments;

1.12 That the majority of voters in Washington State, deliberately kept ill-informed by state corporate government officials and mainstream/alleged alternative media corporations operating in Washington State, passed this stealth measure by a large margin in November 2006, to be ratified as a constitutional amendment by the state legislature in January 2007;

2006 Washington State Voters Guide Writeup on State Issue 4215

<http://vote.wa.gov/Elections/Measure2007.aspx?a=4215&c=7>

1.13 That, since early 2004, the WSIB has deliberately invested a large portion of its institutional investment portfolio in derivatives and credit default options (CDOs), the most opaque, unstable investment instruments imaginable;

1.14 That, due to the corporate bailouts and banking cartel-engineered depression of 2008, as well as the WSIB's prodigal, imprudent corporate Wall Street investments, the Washington State Education Fund now has been depleted by half, due to the resulting devaluation of institutionally invested stocks and bonds;

1.15 This has served to radically increase tuition and student loan indebtedness while radically decreasing the availability and quality of higher education to the people of Washington State ;

1.16 That all of this occurred less than two years after Issue 4215 was stealthily and deceptively introduced by the WSIB, passed by the majority of voters, and its related constitutional amendment approved by their state legislators;

1.17 That the amount of the people's money deliberately being squandered in volatile institutional corporate Wall Street investments is at least eighty times the amount of the alleged state budget deficit of approximately \$1 billion, which this invested money could have easily eliminated if used responsibly;

1.18 That the above cited Washington State officials continually demand increasingly exorbitant taxation and licensing fees from the already deliberately financially stressed people of this state;

1.19 That they do this is while being entrusted with massive amounts of the people's money, yet knowingly and willfully withholding and purloining it for the benefit of the private international banking cartel and those who secretly control it;

1.20 That the immediate motive for this treasonous fraud perpetrated by the above cited Washington State corporate government officials and their predecessors in office and mainstream/alleged alternative media corporations operating in Washington State against the people of this state has been their greed for both wealth and power, accepting lucrative bribes, kickbacks, campaign contributions, loans and lucrative advertising contracts, as well as enhanced monies from personal investments from the corrupt international banking cartel and other corrupt transnational corporations;

1.21 That the actual underlying motive of these corporate state government officials'/media

corporations' corporate contributors has been, besides huge profits, the financial destruction and enslavement of the people of this state;

1.22 That therefore the Washington State corporate government budget and its budget deficit are now, and have been since at least the mid-1940s, fraudulent;

1.23 And therefore all budget cuts made on the pretext of this fraudulent state budget deficit that now threaten the general welfare — including the health and well being of the disabled and disenfranchised, the cutting of public library, public transportation and public education services and those budget cuts which threaten to privatize all of the Washington state park system — are therefore criminal.
