CAFR1 NATIONAL POST

ARCIVED AT: <http://CAFR1.com/GetEven.html>

Don't get angry, get even!

Is and was there a News blackout on the CAFR?

by Walter Burien - CAFR1
02/08/18

OK, let's establish the fact that there has been a massive and cooperative effort by the Government, the News Media, and Controlled Education in creating and maintaining an almost complete blackout of the mention of the Comprehensive Annual Financial Report (CAFR) in their efforts to keep the general population clueless as to the financial takeover of the wealth of this country by collective government over the last 70-years.

We all know Google is the most extensive search engine on the planet today. The trillions of open source records maintained by Google is of no equal.

Well, this aspect of Google can be very telling when specific **time periods** are selected to be searched. For this example here, we will search the "**News**" feature of Google. Google archives go back over a hundred years.

So was there any mention from the "**Syndicated News Media**" of the CAFR over the last 60-years?

Keep in mind the CAFR accounting structure started in 1946 by the efforts of **GFOA** (Government Financial Officers Association) and became the standard by action of **GASB** (Government Accounting Standards Board) across the land in 1977. The CAFR is local government's statement of Net Worth, the most **informative showing** of the actual and massive wealth held and income generated by every local government across the land, or in personal comparison, an individual's Statement of Net Worth.

A document every taxpaying individual from across the land should have been going over with a fine-tooth comb to investigate and learn the "true" financial picture of their local governments that were hitting them up for decades crying shortfalls of money for more, more, more in taxes, fines, and fees. Increases perpetually enacted each and every year. The CAFR is local government's **Holy Grail** of accounting. So was there a cooperative effort being done to make sure the population did not have a clue?

Let's see:

The following is a Google News search from October 12th 1955 through January 1st 2009, 54-years:

(GOOGLE NEWS SEARCH OCT 12, 1955 to JAN 1, 2009) https://www.google.com/search?q=%22Comprehensive+Annual+Financial+Report%22&biw=1366&bih=604&source=Int&tbs=cdr%3A1%2Ccd_min%3A10%2F12%2F1955%2Ccd_max%3A1%2F1%2F2009&tbm=nws

Gee, a massive 2-hits. Mind boggling. Even one of the two being from the country of Liberia. Not a peep per News articles towards local "Governments" here in the USA and CAFR findings. The other was a simple mention by Forbes.

So here we can deduct one of two things:

1: The thousands of News Reporters or talking heads employed by the syndicated News media over that 54-year time period had a section of their brains lobotomized so that when hearing of local government's complete accounting record the CAFR, the response was to draw a absolute blank; or,

2: There was a massive cooperative effort in place to make sure no mention of the CAFR came out to the population due to one fact, and one fact only: Due to the massive wealth building within local governments; those with their hands deeply in the kitty from within government and their outside players; and to create a void in comprehension within public circles as to the "collective" takeover of the wealth by local government upon review of the collective totals shown within the now 180,000 + CAFRs completed by local governments each year.

Would this be considered a conspiracy? NO, DEFINITELY NOT!

What it is by definition would be: A showing of organized crime of no equal. Masterfully wrapped and presented with the logo being: "**We are here to help and serve you.**" Yes, right, with one small omission: as they systematically and exponentially take control over all that you have, or ever will have. Your life, wealth, children, property, income, or anything else they figure has value to it that they can take.

Would an organized crime syndicate want anyone to see their blueprint and showing of the wealth they are amassing from their victims? Most definitely not. They would go far out of their way to make sure that did not happen.. The organized crime syndicate would want their victims to think they are barely getting by, when in fact the exact opposite is true.

Let's throw a wrench into the gears of the smoothly unfolding equation commencing as of 1946. A slight problem for its intent starting in the year of 1998. Walter, CAFR1, goes to war with the syndicate for forced disclosure of the CAFR accounting structure bypassing the lock coming from the syndicated media, controlled education, both primary political parties, and most importantly of all, the intentional void maintained in the public's cognitive thinking . Hundreds of radio shows were done by CAFR1 through the private non-syndicate owned media; hundreds of articles were published through the private non-syndicate owned publications; conferences and action groups were implemented. Millions of individuals from across the USA and world were reached with disclosure. Internet chat that could not be controlled erupted with a fury.

Well, suppression from the syndicate went into high gear. Internet search engine results actively suppressed; government skills blasted to confuse or misdirect; silence was strictly enforced from any party the syndicate had control over. Those the syndicate did not have control over, that had the ability to reach the general population in numbers, and did, were targeted for elimination.

The population needs to get a clue as to the scope and size of the syndicate they are facing. It is the largest organized syndicate the Earth has ever know, collective government. They do not play fair, and their takeover of the wealth is now absolute and locked down in force of no equal.

Now keep in mind that from 1998 to 2005, many privately owned "News Outlets" published feature

"News Articles" per the CAFR. WND, Media Bypass, Idaho Observer, The Spotlight, etc, etc. Did "one" of those "News Articles" show in the Google search results? No they did not. Again, it must have been that lobotomized factor for Google so that when seeing circulating "News Articles" of local government's complete accounting record the CAFR, the response was to draw a absolute blank.

In reality, it was just another showing of the control factor in absolute application. Did you ever hear that old expression of: *"If the largest tree in the forest fell, and no-one was there to see it fall, did it actually make a sound?"* The syndicate knows this factor all to well per the CAFR, and goes substantially out of their way to "only let the population be there to see what they want them to see."

The syndicate, with millions now having become aware of the CAFR, due to CAFR1's effort for disclosure, and those who took the ball and ran with it, had to do some damage control per giving some visibility to what a good percentage of the population knew existed as fact. I note when CAFR1 started with disclosure in 1998, before doing so CAFR1 did a Google search for the report and the yield was 16 (sixteen) hits on a general Google search.

As more and more people became aware of the CAFR, and local governments when confronted by residents per the CAFR, at first the local government officials played the **"Deer in the Headlights"** response, CAFR, what's that?" Well, that did not go over to well after the residents tracked down the CAFR for that same local government.

What local governments did then in response was to put the CAFR reports on that local government's website for the purposes of "plausible deniability" where they could say: *"We are not hiding anything, look our CAFR is available on this location of our website."* They would never direct the population to it, they would only mention it when confronted.

So, back to Google and the syndicated News Media and the reality they were now facing of millions of individuals from across the land now knowing about the CAFR. Let's take a look at January 1st, 2009 to February 8, 2018 per "News Articles" that the population was **"allowed"** to see:

(GOOGLE NEWS SEARCH JAN 1, 2009 to FEB 8, 2018) https://www.google.com/search?q=%22Comprehensive+Annual+Financial+Report%22&tbs=cdr:1,cd_min:1/1/2009,cd_max:2/8/2018&tbm=nws&ei=2X98Wu72FlicjwPg-52YBw&start=0&sa=N&biw=1366&bih=604&dpr=1

Wow, 200+ News Articles. In reality if the massive censorship was not at full play, there should have been thousands. Take a look at the impression those hits try to project. They give the impression of "normalcy" but do you see any comprehensive or **any editorial articles** from the New York Times; Wall Street Journal, LA TIMES, Chicago Tribune, or any other syndicate owned publication in the Google News hits? No, you do not.

Don't get angry, get even!

Share this communication with all that you know and ask them to do the same. **I note a very important fact:** The censorship that is in place, is very effective. CAFR1 learned a few years back that mail servers were in cooperation with the censorship. Only about 1/3 rd of those on CAFR1 subscribers list will get the CAFR1 posts. They are blocked from the other 2/3 rds getting the posts. Additionally, if a subscriber does get the post and they try to forward to their lists, the majority they send to, do not get the post. They are blocked also. If you forward, check with those on your list and ask them if: they got the forward from you?.. Most will say they did not.

So with that in mind, to be effective, posting the communication on your website will be more effective. Publishing the communication to a chat-board, social media, or a print publication will be effective also.. If you put the communication on your website, from that point forward, spread the link to it far and wide.

Like I said: "Don't get angry, get even!"

How does the syndicate get away with doing what they are doing? It is done through a well orchestrated effort on their part to masterfully entertain the population off into distraction of irrelevancy.

A never ending year after year loop, of holidays; sports; celebrity; gossip; etc., promotions that gives the population the impression everything is fine and dandy in Alice and wonderland known as the USA.

We are mass-marketed to, to see only what the syndicate wants us to see, good or bad, and done so by them so they can keep us like the little chipmunk running on the treadmill wheel, as they tap off 85%, directly or **indirectly**, the energy that we on that wheel produce. It also keeps us glued to the revolving door of the News the syndicate spoon feeds us with the exclusion of the most relevant factors, in reality, we face today.

On a personal note, you, I, and all others are faced with the controlling propaganda we face and are spoon fed each and every day. It is designed to make us withdraw in apathy and to not think we can make a difference. Those in apathetic withdraw will stick their heads up once in a while but will usually quickly withdraw to their comfort zone just to watch and be influence in that zone via media designed to masterfully entertain them to be of no consequence to the syndicate.

Let me make it very clear here: We are at war with the syndicate in their efforts to maintain control over the wealth they have taken and intend to take. The open light of disclosure, and disclosure most importantly comprehended is the syndicate's Achilles heel.

Again, Don't get angry, get even! The syndicate's efforts and solid wall of censorship in place today gets broken with simple disclosure comprehended by the masses.

At this time we have maybe 10% of the population who now have a clue as to what is going on. Increase that percentage to 80% who truly comprehend, and then the syndicate is in real trouble per the errors of their ways...

I think a few of us can bypass the syndicate's blackout per the CAFR and the structure behind it per the takeover of the wealth involved. The message to the masses has to be clear. **That message is:** The masses need to comprehend this so share with all that you know.

Here are a few example listings of CAFRs, 4600 of them by state and category all can share - <http://CAFR1.com/CAFR-Examples.html>

Keep it simple: Here are our local government CAFRs, and upon review, see what our local governments have turned into, and how they have step by step taken it all from us. Many will not understand and revert to their TV remotes or change the dial on their radio.

Oh, well. What is important, is the fact that most running a small or large business for themselves, the backbone of our country, will understand and see that our governments have evolved over the decades into ruthless, for profit operations, that have and will continued to expand their takeover of it all unless confronted with genuine effective force to change their clear intent to expand and perpetuate the same. So bypassing the syndicate with disclosure is the population's war objective. To take a trip to a destination requires seeing the road before you.

The goal needed is 80% of the population getting a clue, and even better, 80% having a good comprehension of what they are faced with. Then corrective action will come to play and the syndicate boys will really be looking over their shoulders verses what they have been use to doing over the last few decades which is laughing their butts of all the way to the bank each and every day.

On a last note, don't say to yourself: *"I am but just one, how can I make a difference?"* Don't lie to yourself. You see, you are 1 of over 385,000,000 individuals from this country. Passing on comprehension by one individual to 100, and done well, the 100 on to a thousand, and so on can be done. Done even though the syndicate has what can be said is: absolute power and control. As the syndicate knows: It is simply a numbers game.

So, for US the same applies. The number to reach is 80%. The individual 1 can become 350,000,000 1's, one at a time and do so very quickly "if" **we all realize we are at war.**

No game here folks. We are at war and the outcome for our and our children's lives depend on us being effective. So let us all stop whining to each other and let us be as "effective" as we can to walk, run, or jump over that wall of censorship and masterful entertainment well in place as we all face today.

The syndicate's fear? The people are coming, the people are coming.. 80% folks, now make it happen. Each and every one of those 1's out there until those 1's become 80%. Time to take back our country.

Do not let the syndicate, or their disinformation agents distract you down a road that has no consequences to them. Stay focused on the **"spinal cord"**, the syndicate's take over of it all from US.

Their CAFR is the starting point for the accounting of it all. One CAFR is but one. Collectively, the showing from them all shows and establishes; the clear takeover of the wealth of this country, in absolute form from: We the People. No ifs, and, or buts, we are at War. Winning or loosing that War will determine our futures... This is a matter of life or death folks. I choose life! What about you? In life, when there is a storm, we all can hear the thunder!

For National and International distribution.

God's speed and Truly Yours,

The Way it is - Corporatism and the TRFA

by Walter Burien - CAFR1
07/21/18

Well, Corporatism... standing facts:

In the 1800's and early 1900's, individual capitalists started and built the large corporations to a point of extreme wealth.

When extreme wealth is standing, "others" look to take it. Who took it?

ANSWER: Where the organized power always stood over the centuries, Government.

Government in the 40's, 50's, and 60's built the structure whereby they could facilitate the creation of massive investment accounts that as time went on, the wealthy corporations were systematically taken over one piece at a time, a little more, each and every year, and come the year 2000, government, local and federal, collectively took it all over by investment. Equity stock ownership; funding corporate and private sector debt, etc. Two large Private associations created by government membership that oversees and sets guidelines for government financial operations:

<http://GFOA.org> and <http://GASB.org>

As viewed in the data compiled by the Federal Reserve Board annually of Total Wealth from all sectors Z.1 Report, Government's collective investment wealth held come the year 2015:

SOURCE: <http://cafr1.com/TotalWealth.html>

DATA TABLES: <http://cafr1.com/STATES/007-Total-Wealth-2015-z1r-4.pdf>

Local and Federal Pensions: 16.4+ trillion dollars

Local and Federal collective investment in "home and corporate mortgages" 19.1+ trillion dollars.

The wealth held by the Banks; Brokerage; and Insurance Companies is 60% + compiled from collective government investment funds held and invested by those companies.

So here is a tip for you: The Government Takeover of it all over the last 70-years initially was facilitated through and by utilizing a small allocation from taxation each and every year. One of my favorite examples is: There are only so many nickles in a dollar. With government investing 5% of their massive take each year, it did not take that long (about 40-years) before they owned the whole pie.

You now know why Gorbachev for Russia in the 80's and then China come 1999 decided to go Democratic. They looked at the numbers in the USA and the effectiveness of the ongoing takeover of the wealth by government and said to themselves: ***"They have more control over the population and are making ten-times as much then we are, it is time to go Democratic. They wrote the better blueprint for government controlled communism then we have and were operating under."***

Now that they have done it, taxation is now a significantly smaller percentage portion of Government's gross income. The #1 percentage (about 65% of the gross) comes in from investment income, and I note with a large portion coming in from "International" investment income.

Guess what? With restructuring to make the population the #1 beneficiary of the investment wealth "currently" held by government, AND also honoring all Government liability contracts ongoing, taxation can be entirely phased out AND eliminated.

I am currently working on what I call the TRFA (Tax Retirement Fund Association). A private association who's name says it all, to "Retire Taxation".

The National Headquarters is in the process of being built in the City of Gallup, NM, a city which as a small town holds the title of the "Most Patriotic City" in the USA.

The TRFA's sole objective and charter is designed to consult with local governments in the USA, Canada, and elsewhere to establish the fiduciary trust principle to meet that local venue's budgetary requirements where taxation is not needed.

What do you think? Sound like a novel idea who's time has come?

Now I am sure you have heard the story of David and Goliath. Well here, the Goliath is about a million times larger than the Goliath David faced. But then I have always liked a challenge. My BIO: <http://cafr1.com/BIO.html>

Backing came in from an individual from Texas in 2014 to get things under way. Currently I am in contact with several individuals where my objective is to raise 12 million dollars to finish off the headquarters; get it staffed; up and running; and have a budget for the association to last two to three years until a solid stream of revenue is established from operations of the association.

The "Trade" that takes place here is:

1. The population regains "ownership" of this country under a structured operating principle that government will now be operating under;
2. This type of structured operating principle creates a thriving, perpetually generated loop of prosperity for "One and All", the population, corporate (large and small), and government;
3. The hostility level that now exists between the runaway takeover government and a slightly bled dry population, on a scale from 1 to 10, (currently at about a 9.5) evaporates down to under a 2 almost overnight with everyone on the same page for the 1st time in the history of this planet.
4. No longer is there a need on the part of government to hide its wealth from public view or to selectively promote government projected debt (liability) to mask the ongoing takeover of it all. Under the TRFA principle of operation, we all are striving for the same objective, and all are on the same page: A prosperous, self perpetuating, striving economy for "One and All".

5. Good news: The entire structure is in place today to make this happen rather quickly. You see government with the intent to internally create massive wealth for themselves has: The entire managers and management teams in place today to do the job; The entire wealth base of investment funds in place today with rather small allocations will allow for the creation of TRF (Tax Retirement Funds) that are institutional investment trust funds that will be designed "exclusively" to meet local governments (City; County; School District; and State) ongoing annual budgets.

Can you see a better future for this country over making this happen? I can not. If and when done where it becomes the standard, I view this as the step that leads to one-thousand years of prosperity for one and all. Personally to myself I call this the Millennium Project, a thousand-years of prosperity for one and all.

As happened in 2014, I received a call from Texas where the question was asked: "What do you need to start the project?" I said \$640,000. The following week, the check for \$640,000 came in and the project was started.

Currently I have let a few individuals know that to finish the start-off and have operating funds for 2 to 3 years, \$12,000,000 is needed.

It may come from one of the four individuals I am discussing the matter with now who have the revenue needed, or I may just get a call from an individual who says: "You need \$12,000,000 to do what you say you are going to do, the check is in the mail."

That's the way it happened from Texas in 2014, and it may be just the way it happens in 2018. The word is out there, I like good surprises :)

If everything falls into place, about 11--months after that point, the TRFA should be staffed; up and running; the press events and information disclosure about the project will be rather massive to the local government bodies; the population; and the corporate financial and business communities will be comprehensively briefed.

My only focus is to make this happen. I do not look or go elsewhere if it is not directly pertaining to getting the TRFA National Headquarters up and running. I live and stay alive to make this happen.

Here is one piece of advise: The government shills out there are very happy with the way things are right now and have been so for the last 40-years. They have a visceral reaction to change, and especially change that puts ownership of this country back into a structure that **DIRECTLY** benefits the population with the massive wealth and income standing and held by government. They will use any tactic to misdirect the population

from cognitively understanding the simplicity of what the TRFA's objectives are. The tactic of blasting any post or article with anything else that has nothing to do with what is being brought forward here will be used. Comments of why not and not let's make it happen will be exerted. And last but not least: Contrived Attack the Messenger. You see, the population was used and spoon fed over the last 70-years exactly what the PTB wanted them to digest. Done so, whereby the takeover would be much more easier to accomplish. They were and are pro's at doing so.

Well, in reality, we owe them a very big Thank You. You see, they have created the massive wealth standing whereby with the restructuring through the creation of fiduciary trust funds to meet ongoing local government budgets as is the objective of the TRFA, the job of phasing out and ending taxation under strict terms can be facilitated as time goes, in the blink of an eye.

I keep breathing to make this happen. I am now 62-years old and the last 20-years really turned up my learning curve to make his happen.

Want to help "in reality" as is needed? If yes, don't hesitate to call.

Walter J. Burien, Jr.
Manager - TRFA LLC
P. O. Box 2112
Saint Johns, AZ 85936

Tel. (928) 458-5854

PS: The TRFA operating principle is applicable to any country on this planet. As noted, a closed self-perpetuating Eco-loop: "Prosperity for one and all for a thousand years" It's time has come! On a last note: "Quitters never win and winners never quit." As I noted before: "I like a challenge"

Over the past several decades, U.S. city, county, and state governments have increasingly adopted a wide set of policy tools to spur community wealth building. Most commonly, local and state governments are investing directly in local businesses through economic development programs, which make loans to or investments in local enterprises, and with the ability established of using TRF fund monies to support businesses within their regions, the benefits are self evident.

State and Local Investments play a critical role in building community wealth for several key

reasons:

They provide needed capital to local businesses, which helps create and preserve local jobs and ensures healthier, local economies.

Local business success generates increased revenues for localities, which can be used to support important community needs and amenities.

Since local businesses are likely to rely on local suppliers and service providers, such investments also have a positive economic multiplier effect that helps ensure that local dollars will remain and recirculate within the community.

Investing a portion of TRF investments in area businesses helps local enterprises succeed, and thus, also generates greater TRF investment return revenues that can be used to enhance infrastructure and services.
